COMPANY BACKGROUND

Founded on July 16, 2015, Incappta Private Limited emerged with a visionary pursuit: to revolutionize poultry farming through specialized construction services for fowl runs, cutting-edge livestock rearing technology, comprehensive onsite technical support, and expert poultry production consultancy. Our mission has always been to empower farmers by significantly reducing production costs and boosting profits, leveraging the latest trends in agricultural practices. We achieve this through our innovative fowl run designs, seamlessly integrated with state-of-the-art livestock production technology.

In a landmark year, 2021, our expertise and dedication bore fruit as we secured numerous prestigious contracts. These included partnerships with Irvines Zimbabwe for broiler contract growers across multiple regions in Mash East (Dema, Marondera, Bromley, Darwendale, Mahusekwa, and Beatrice), collaborations with SABLE Chicken growers in Rainham, and significant projects with esteemed institutions like the University of Zimbabwe, where we undertook a massive 60,000 broilers project. We were also instrumental in the Zimbabwe Command Agriculture poultry scheme, further cementing our reputation in the industry.

As demand surged for our construction and broiler equipment services, we witnessed a parallel growth in our team. Today, Incappta Private Limited stands proud with four robust teams of skilled builders, innovative architects, adept metalwork technicians, and knowledgeable water engineers. United in their expertise, they are committed to delivering exceptional quality service, even at short notice.

Looking to the future, our dedication to excellence remains unwavering. We pledge to continue providing unparalleled services to our clients across Zimbabwe and extend our reach throughout Africa. At Incappta Private Limited, we are not just building structures; we are cultivating a legacy of innovation and excellence in poultry farming.

ABOUT US

Incappta Agri- Structures and Equipment is a premier provider of top-quality Agri-construction solutions & livestock production equipment. With a strong focus on delivering excellence, we specialize in designing and constructing fowl runs compatible with automated poultry hardware, constructing, and equipping them . We understand the critical importance of creating optimal environments for poultry farming, and our solutions are tailored to ensure maximum efficiency & overall productivity. By leveraging our deep understanding of the industry and utilizing the latest advancements in construction technology, we consistently exceed client expectations and set new standards of excellence in the field.

VISION & MISSION

MISSION

Incappta Agri Structures is committed to transforming the agricultural sector. Our mission is to blend innovation with expertise, creating advanced fowl run designs that align with smart poultry technology. This integration aims to enhance productivity while minimizing input costs, leading to a more efficient and profitable farming experience.

VISION

Our vision at Incappta is to democratize access to agricultural construction services and modern farming technologies. We strive to offer affordable, intelligent farming equipment, and to be a hub for research and the dissemination of groundbreaking agricultural ideas. Our goal is to enrich the knowledge base of farmers throughout Africa, introducing them to the latest farming trends. We aim to revolutionize their seasonal routines, not just improving their methods, but also making them more cost-effective.

CORE VALUES

INTEGRITY

At the core of our service ethos is integrity, which we uphold as our badge of honor. We are dedicated to maintaining our credibility through a commitment to honesty and competence in our workforce. This principle guides us in consistently delivering superior products and services, ensuring that we always act with the highest standards of integrity.

EFFICIENCY

Our commitment is to consistently delight our clients, who are the focal point of our operations. We aim to boldly venture into new markets, establishing strategic partnerships with entities in the livestock and poultry industries, as well as with distributors, suppliers, and the retail food sector. These collaborations are key to fulfilling the needs of our expanding clientele.

EXCELLENCE

We uphold a standard of excellence and professionalism in all our operations, firmly discouraging mediocrity. Our employees are recognized and rewarded based on their merit and competency, ensuring that excellence is not just a goal but a reality in every aspect of our work.

TEAMWORK

We strongly believe in the power of teamwork and strive to create an environment that nurtures a spirit of unity and a winning culture. Teamwork is fundamental to our operations, ensuring that we deliver quality, non-mediocre services consistently. Unity is not just a principle but a key element of our operation and success.

AGRI-CONSTRUCTION

AGRI-STRUCTURES

Incappta Agri-Structures and Equipment stands at the forefront of agricultural construction solutions and livestock production equipment, dedicated to delivering unparalleled quality. Our expertise lies in the meticulous design and construction of state-of-the-art fowl runs, seamlessly integrated with automated poultry hardware. We recognize the vital importance of providing optimal environments for poultry farming, and our bespoke solutions are crafted to enhance efficiency and boost overall productivity.

At the heart of our operations is a profound understanding of the agricultural industry, combined with a commitment to utilizing cutting-edge construction technologies. This approach allows us to not only meet but consistently surpass client expectations, establishing new benchmarks of excellence in the agricultural sector.”

AUTOMATED POULTRY HARDWARE

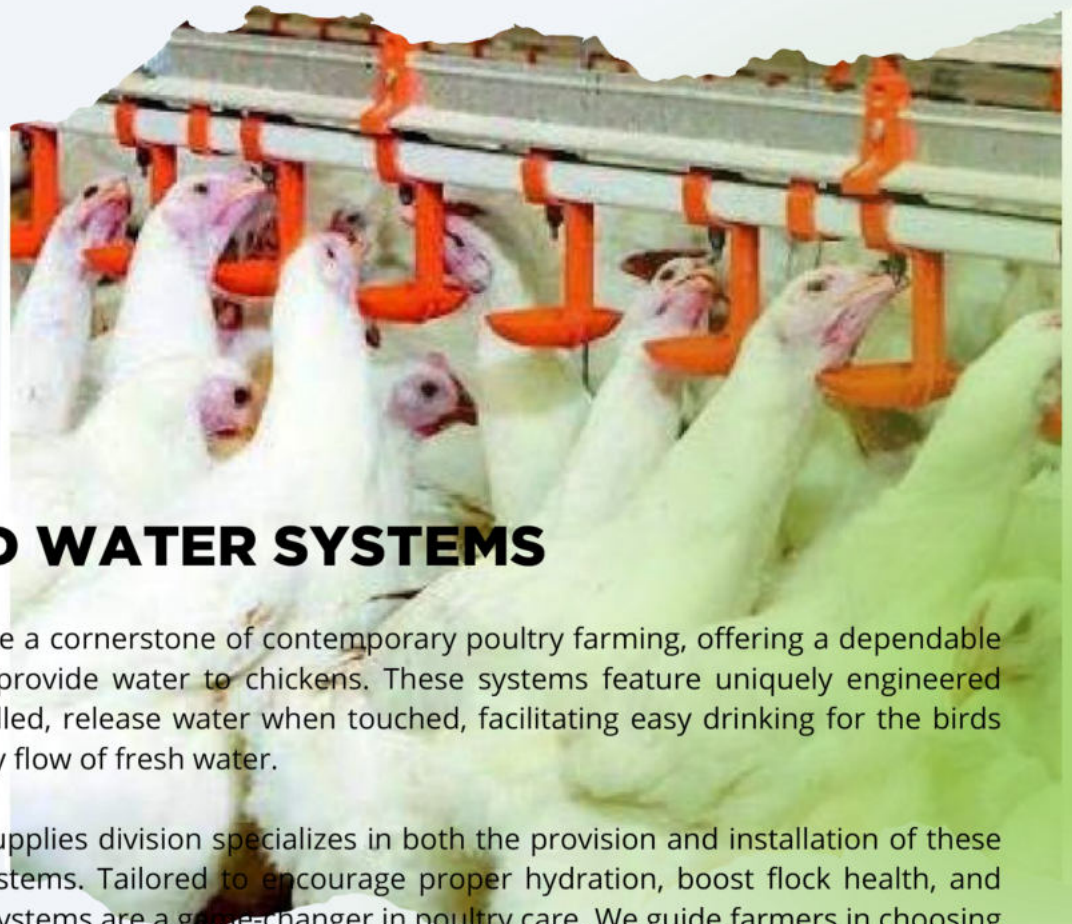

PAN FEEDER SYSTEM/ ELECTRIC CHICKEN FEEDER SYSTEM

Pan feeders are vital tools in modern poultry farming, designed to enhance feeding efficiency and effectiveness. These feeders, characterized by their circular pans, are engineered to evenly distribute feed to chickens. Their design facilitates controlled feed access, minimizing waste and creating ideal feeding conditions for the birds.

Our expertise goes beyond just supplying top-quality pan feeders; we also specialize in their expert installation. Our skilled team meticulously installs these feeders, taking into account various factors such as the size of the flock, the type of feed used, and the specific layout of the poultry house. By providing a full range of services, from supply to installation, we ensure that poultry farmers are equipped to fully leverage the advantages of pan feeders. This results in healthier, more efficiently fed chickens, optimizing both growth and feed consumption.

AUTOMATED WATER SYSTEMS

Nipple drinker systems are a cornerstone of contemporary poultry farming, offering a dependable and streamlined way to provide water to chickens. These systems feature uniquely engineered nipples which, once installed, release water when touched, facilitating easy drinking for the birds and guaranteeing a steady flow of fresh water.

Our Poultry Equipment Supplies division specializes in both the provision and installation of these top-tier nipple drinker systems. Tailored to encourage proper hydration, boost flock health, and reduce water waste, our systems are a game-changer in poultry care. We guide farmers in choosing the most suitable system, considering factors like flock size and the setup of their housing.

An innovative feature of these systems is the winching mechanism, enhancing their operational efficiency. This allows poultry farmers to effortlessly adjust the height of the drinker lines to match the growth of the chickens, ensuring perfect accessibility for birds at various stages of development and promoting uniform growth. Our winching mechanisms are crafted for longevity and simplicity, enabling farmers to create a comfortable and efficient working environment for optimal poultry care.

PVC TEMPERATURE CONTROL CURTAINS WITH WINCHES

PVC temperature control curtains equipped with winches are essential for maintaining optimal environmental conditions in poultry houses. These curtains, typically mounted on the sidewalls, play a crucial role in ventilation and temperature regulation. By adjusting these curtains, farmers can effectively manage the internal climate of the poultry house.

The setup process for these curtains involves securing the PVC material to a framing or tracking system on the house's sidewalls. Winches, which are mechanical tools for precise control, enable the easy raising or lowering of the curtains. This adjustability is crucial for fine-tuning the environment inside the poultry house.

Strategically positioned along the sidewalls, the winches are linked to the curtains through cables or ropes. By manipulating these winches, farmers can alter the curtain height to modulate the airflow and natural light entering the space. This flexibility is vital for adapting to different weather conditions.

In warmer climates, the curtains can be opened partially or fully to maximize ventilation and cooling, thereby preventing heat stress in the poultry. Conversely, in cooler conditions, the curtains can be partially or fully closed to retain warmth and provide insulation.

Our team offers comprehensive on-farm service to ensure the curtains and winches are installed correctly and function as intended. We bring a wealth of expertise and experience, enabling us to tailor our service to the unique needs of each poultry house, from measuring and cutting the curtains to their secure installation.

TESTIMONIALS

"Working with Incappta has been a fantastic experience. They are extremely knowledgeable and professional, and they have helped us achieve great success through the construction of our fowlruns in Rainham"

**Mr P. Muchakwa , Contract Grower for Sable Chickens
(40,000 Broiler site capacity) Rainham Harare.**

"Incappta has installed electronic feeders ,water systems and PVC curtains at our Agro industrial park farm. Their knowledge of the industry and their products is top-notch, and their customer service is excellent. We are very happy with the results we have seen from using their services."

**Mr G. Marere ,
University of Zimbabwe Agro-Industrial park
Farm Manager**

"I have been very pleased with my experience working with the Incappta team . They have provided quality equipment and efficient at my site that has helped us improve my poultry operations. We would highly recommend them to anyone looking for the same service & products

**Mr Paradzayi , Contract Grower with Surrey chickens
12 000 Birds site capacity**

"Incappta supplied and installed chicken house equipment (autodrinkers) to our farm site.They did a fantastic job; the system is working efficiently and we do not hesitate to recommend them to anyone wishing to buy chicken equipment from them"

**Mr John Chikura ,
Contract Grower with Irvine's Zimbabwe
Capacity: (60,000 Broilers)**
